

**Somerset 2003: During Bill Courter's session with Lou Hopf and his son Jim's collection of Bristol Brass lamps. Lou, Jim and Fil with the Bristol "P&A Royal knock-off" that seems to have begun the slide to lamping oblivion for Bristol.**

**Rob Isdale at a school near his home, giving a demonstration following up a child's question about an old lamp part found on the school grounds. From the Q&A Page to real life!**

Somerset 2002: about 1/2 the known surviving BAYNES patent lamps (both versions represented), and one of each LIT. Heinz Baumann with his two, then Paul Rausch and Fil Graff with their lamps LIT. Unlikely we'll ever see the likes of this demonstration again!
