

SF Bk 1 English letter 29 – transcribed (by Brian Falk)

5th Oct (189)3

Herr Thurnauer

Your telegram to hand. Am glad to hear that Schwintzer will *drop or charge &*

but don't believe it quite yet. As regards Draples Automatic Burner we sent off today by parcel post divert to Schneider. *Pattern* did not accept it & by parcel post it cannot reach you by Saturday morning. So you must arrange with Schneider without the sample. We want next year III II & I Qual(ity) all in safety i.e. Automatic. The arrangement should not exceed 2% or 2 ½ % a Burner. Schneider is to attack the matter at once. As regard the flaps (shutters) which extinguish the flame say he must adopt for all his Burners, no spring needed. But at the same time give him to understand that this particular arrangement is our patent & that nobody but us in Germany or England must have it. I am going for a big game, viz all our Burners to have Safety Automatic Extinguishers to prevent loss of life & fires

Yours truly, S Falk
